Technology for those assisting the impaired

January 2023

By Sue Kayton

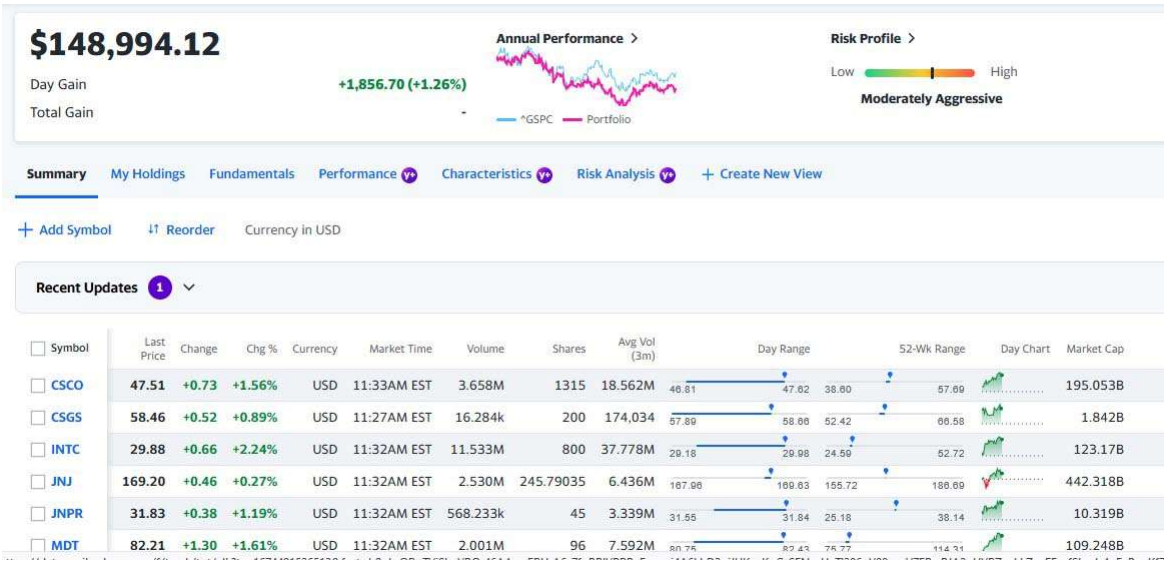
They need a separate computer or device

- Don't let them use your primary computer
- They could infect it with a virus
- They could compromise your passwords

Keeping them (and their money) safe

- Prevent access to online banking and stock trades
- Keep a list of their passwords and usernames
  - Including login for computer
  - Include smartphone unlock codes (or set to not use unlock codes)
- Enable parental control on browsing
- Prevent installation of software
- Check for viruses weekly
- Monitor emails, and make sure the mailbox doesn't fill up

Yahoo Finance for stock traders



Change to tablet or Chromebook

- Easier to restrict
- Easier to remove viruses or other malware
- Cheaper and more reliable

Important information -

- Fill out this form for yourself and your loved one. Put it someplace safe and send a copy to a trusted friend or loved one
